

STAIR UNITS

Where frequent access is required to a roof area, or where materials are to be carried to a raised area a staircase is the only option that complies fully with the Work at Height Recommendations and BS5395: Part 3. As such it provides the safest and most complete access solution for height access; it is available designed to specifically meet any site conditions or locations or as a ReadyMade Solution with on-site flexibility built in.

FEATURES

- **250mm deep non-slip treads**
- **Tube and clamp handrails for easy assembly**
- **Lightweight aluminium construction**
- **Supplied in easy to assemble kit form**
- **Powder coated to any RAL colour**
- **Fixed or freestanding units**
- **Height adjustment if required**
