

# VERTICAL ACCESS LADDERS

The T&I Solutions range of vertical cat ladder systems is a completely new way to solve a vertical access problem. Supplied as a pre-drilled set of parts ready for on site installation the T&I Solutions vertical ladder range comply fully with BS4211:2005 + A1 2008 and BS14122: Part 2 2001 + A1 2010. They can be supplied with short lead times to be assembled and adjusted to suit most site requirements. Supplied with or without cages and hoops T&I Solutions fixed cat ladders are ideal where fixed, static access is required.
